Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashi in view of Perry for the reasons of record.

Applicant's arguments filed 7-29-2004 have been fully considered but they are not persuasive. The use of a side-cut fraction is clearly shown by Perry. Distillations in the petroleum industry follow the same physical rules as those in the chemical synthesis industry. The benefit of breaking up the distillate into 3 fractions rather than 2 would mean less liquid had to be distilled in the second fraction. Recycle of starting material as recited in claims 2-11 of course is a standard expedient.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
